

Prep for 5/14/14 NWEA Meeting on Oregon CZARA  
Draft 5/13/14

Messages:

- We believe the work on CZARA is very important and are dedicating significant resources to making a final action.
- We take the Settlement Agreement commitments seriously.
- Reiterate JB/Paul conversation that EPA's and NOAA's read of the Settlement Agreement was that the May 15, 2014 date applied to final disapproval and subsequent 30% penalties the following fiscal year together. **Ex. 5 - Deliberative**
- We're prepared to apply penalties if we make a final disapproval decision.
- We need an extension to get through all the comments. It's a significant action to disapprove a state's program, so we need to make sure we read and respond to comments thoroughly while still working quickly to taking a final action.
- NWEA will likely ask when we think we'll be done. We can answer that we think we'll be done by January 2015 with either a final decision to disapprove or a notice of intent to approve Oregon's program.
